My Portfolio here!

PROFILE

I'm Hieu — a game programmer who turns ideas into gameplay, systems and interfaces that feel clean, responsive and fun to play. I've shipped features to live games with real players, and I care about the small details — game feel, polish and performance — that keep people coming back.

WORK EXPERIENCE

RIVRS
04/2026 - PRESENT

Game Programmer

- Implement gameplay features, systems, and UI components for live Roblox games.
- Develop and extend reusable modules and packages to support scalable game functionality.
- Implement and maintain core gameplay systems, including trading, multiplayer interactions, and gameplay loops.
- Test, debug, and validate feature updates in separate development environments before production deployment.

RIVRS
11/2025 - 03/2026

Game Programmer Intern

- Assisted in gameplay and UI implementation for Roblox games.
- Collaborated with the development team to implement features and resolve issues within the existing game framework.

Undisclosed Game Project
7/2024 - 10/2024

Game Developer Intern

- Assisted in developing internal tools to support the game production pipeline.
- Worked with Python and C++ for minor gameplay programming tasks.
- Gained hands-on experience in a professional game development environment.
- Project details remain confidential as per agreement.

EDUCATION

Bachelor of Science - Information Technology
8/2022 - 8/2026

University of Greenwich

B2 VSTEP
3/2023

University of Foreign Language Studies

TECHNICAL STACK

- Game Engines: Roblox Studio, Unreal Engine 5
- Languages: Luau, C++, Python
- Frameworks: Knit, Roact, Rodux
- Workflow and Tools: Git, Claude, Rojo, Wally
